

Enoch Flooring SPC Catalog

Singapore SPC flooring and WPC wall panel source support

Use this catalog to shortlist product direction before quotation.

Final pricing depends on product choice, area, site condition, trims, schedule, and document needs.

How to Use This Catalog

1. Choose the space: HDB, BTO, condo, retail, office, or B2B supply.
2. Shortlist the product: SPC flooring, vinyl flooring, engineered wood, or WPC wall panels.
3. Confirm usage: traffic, cleaning, acoustic needs, access, and handover timing.
4. Send room size, photos, finish preference, and target timeline for quotation review.

Factory and Product Review Path

Buyers can review factory source media, product samples, stock direction, and packing discussion.

Production media and stock references help clarify the supply path before larger orders.

For B2B buyers, OEM packaging and specification matching can be discussed after RFQ details are clear.

Document copies are reviewed by product, market, buyer role, and project requirement.

Product Families

SPC flooring: rigid-core option for daily residential and light commercial rooms.

Vinyl flooring: practical option for lighter-use rooms and budget-led upgrades.

Engineered wood: warmer natural finish for higher-design rooms where maintenance is accepted.

WPC wall panels: interior wall finish option for feature walls and project supply.

Next Step

Home projects: request a quote with room type, estimated area, current floor, and preferred finish.

Project or B2B supply: send buyer role, market, quantity direction, specification, and document needs.

Certificates, test reports, warranty terms, delivery timing, and payment terms are confirmed by product and quotation.
